DETAILED ACTION

Election/Restrictions

1. Applicant's election of species 3 in Paper No. 5b, dated 10 December 2002 is acknowledged. Following is a new restriction requirement based upon the amended claims.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-11 and 40 drawn to a method of making holograms with positioning specifics classified in class 359 subclass 1.
 - II. Claims 12-22, drawn to a method of making holograms with specifics of the exposure process, classified in class 359, subclass 25.
 - III. Claims 23-29, drawn to a method of making holograms including diffusing screens and lens specifics, classified in class 359, subclass 1.
 - IV. Claims 30-35, drawn to a method of making holograms with including means for reconstruction of pseudoscopic image, classified in class 359, subclass 22.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, claims 2-11 and 40 evidence that the combination does not rely on the details of inventions II-IV for patentability; claims 12-22 evidence that the combination does not rely on the details of inventions I, III and IV for

patentability; claims 23-29 evidence that the combination does not rely on the details of inventions I, II and IV for patentability; claims 30-35 evidence that the combination does not rely on the details of inventions I-III for patentability. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Claims 1 and 36-39 link(s) inventions I-IV. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 1 and 36-39. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
